

The Metamorphosis of a Successful Landscape Project

1. *Set up an initial consultation*

This is first step in the process. You meet with Michael Galli at your home. You have an opportunity to see our portfolios—both architectural and photographic—and we discuss and consider options for your home's landscaping.

2. *Go on our garden tour*

Metamorphosis Landscaping extends garden tour invitations to those prospective clients who we think we best match values, process, and style. We take you on a tour of five to seven of our exquisite past projects so that you can see the level of creativity and the quality of the workmanship that we offer.

3. *Commission a design*

Once you are ready to move forward with your project, you retain our services for either a formal design or a computerized sketch for your property. The fees for these services are based on the size and complexity of your project. We will be happy to issue you a written quote at the appropriate time.

4. *The drawing process*

The drawing process starts with a complete measurement of your property as well an in-depth interview so that we understand your wants and needs. Next are a series of design meetings focusing on one aspect of the project, decking, masonry, lighting, etc. This helps you make quality decisions for the landscaping needs of your home. Going through the design process with our organization greatly increases your probability for a successful landscape project.

5. *The construction process*

Once you have a completed design, you can choose Metamorphosis Landscaping or any other landscape contractor to install your project. Metamorphosis Landscaping prides itself on delivering the most technologically advanced landscape projects available at a fair price.
